

Let us take care of  
your protection so you can  
focus on your business.

An award-winning answer to protecting the critical parts of your business **that won't break the bank...**

## **What's not to like?**

'Cost effective protection for your business.'

Can protecting your business really be this simple?

**It is now.**

## **It just takes 2 simple things:**

**A single web-based platform** that delivers the pay-as-you-go services to protect your business and **a trusted partner** to manage them...

### **Protect your business**

Communications, data and the internet are the three key areas of risk for modern business. Ensure your users are protected and productive while keeping costs and administration under control.

### **Save time**

Let your trusted IT partner deal with the management and administration involved in protecting your users, data and network so you can concentrate on the important activities that add value to your business.

### **Lower costs**

Pay only for the services you use. Then once you have chosen your services, they are charged in arrears on an actual use basis, you can be sure that you're only spending on active protection.

- No upfront investment.
- Pro-active IT Support.
- No licence keys, no seat limits.
- Key services from the same supplier.

**When protecting your business is this easy...**

*Why complicate?*

Protect your network,  
secure your communications  
and store your data safely.

## All while minimizing your administration and overheads.

### AVG® Remote IT

**Rapid response support without the need for costly and disruptive on-site visits.**

Reduce the need for on-site visits with remote IT management.

- Alerts inform your IT Partner of potential issues before they occur.
- One-to-one chat online support for users.
- Fix unexpected security and non-security events remotely.
- Resolve issues quickly.

### AVG® AntiVirus

**Protect your network.**

Our award-winning AntiVirus protection delivered and managed by your trusted IT partner. Detect, block and remove viruses before they harm your business.

- Automatic removal of incumbent AntiVirus products.
- Inbuilt Firewall protects against intrusion from outside your network.
- AVG® Smart Scanning keeps memory usage down and lets users keep working.
- Automatic updates for minimum administration.

### AVG® Online Backup

**Keep your data secure and available.**

Store your data safely to minimize the impact when data becomes lost or corrupted.

- Three-tier encryption secures data in-transit and at rest.
- Time back-ups to suit your needs and choose what data to store.
- Image and backup Servers using ShadowProtect® for complete protection.
- Only pay for the storage you use.

Control your costs.

**Only pay for what you use.**

## AVG® Content Filtering

**Protect your users and improve the productivity of your business.**

Help keep employees safe when online and utilize access management to ensure their internet use doesn't compromise your business.

- Protect users from malicious online content.
- Block access to inappropriate websites.
- Implement Acceptable Usage Policies using access management controls.
- Incident alerts delivered to your IT partner in real-time for fast resolution.

## AVG® Email Security Services

**Stop spam, secure email, simplify management.**

Enjoy a secure and productive email service. Stop malicious, email-borne content and spam before it reaches your network and eliminate the need for local email storage.

### AVG® AntiSpam

Protect your business against spam, viruses, phishing and other email-borne threats. Unwanted email content is stopped in the cloud keeping it away from your network and reducing bandwidth usage.

### AVG® Email Archive

Eliminate the need to maintain local email storage such as email stores held on local devices (PSTs). Improve productivity with intuitive search functionality and protect against email loss when employees leave the business.

### AVG® Email Archive Lite

Convenient, short-term storage that archives all emails on a rolling 60 day basis.

### AVG® Encrypted Email

Secure your email communications with rules that identify sensitive email content and encrypts emails that meet the defined criteria.

Simplified IT management for the small business
